THE ART OF MINERAL BEAUTY

Margaret & Stephen de Heinrich de Omorovicza

THE CITY OF HEALING SPRINGS

The Omorovicza story begins over 2,000 years ago, when the curative properties of Hungary's healing waters were discovered and the first baths were built in Budapest.

The mineral-rich healing waters of Budapest have been prized for their healing powers ever since.

Here the earth's crust is thinner, so waters absorb beneficial minerals more effectively as they journey to the surface.

With over one hundred thermal springs famed for their curative powers, Budapest has more bath than any other city - it was named the International Spa* City in the 1920s.

*The acronym 'SPA' stands for the latin 'Sanitas Per Aqua' - or health through water.

The Racz Spa, Budapest

OMOROVICZA SPA

In the 1800's, the Omorovicza family built the beautiful Racz Spa on the site of a medieval healing spring, renowned for the curative properties of its water.

Some two hundred years later, founders Margaret and Stephen de Heinrich de Omorovicza met in the beautiful city of Budapest.

Relaxing at the Racz Spa and other ancient thermal baths, the couple were amazed by the effect the mineral rich healing waters had on their skin and saw their potential to be harnessed in a skincare range.

HYDRO MINERAL TRANSFERENCE™

Much is already understood about the beneficial effects of thermal waters on bathers. However the absorption of minerals into the epidermis and the dermis presents a significant challenge due to the limited bio-availability of minerals.

Working with a Hungarian Nobel-prize winning Laboratory of Dermatology, Margaret and Stephen pioneered and patented a delivery system that reconfigures the molecular structure of the minerals in the healing waters and brings the minerals directly to the deeper layers of the skin.

Hydro Mineral Transference™ allows optimal absorption to empower genuine healing.

Day by day, skin becomes firmer, more supple and younger-looking.
